CAPABILITIES STATEMENT

Capitol Contracts LLC | Clarksville, AR *Veteran-Owned Small Business | SDVOSB Eligibility Confirmed (DD214 Pending) | HUBZone-Eligible (Rural Arkansas)*

UEI: HH77KN5AV5X7 | **CAGE:** 9ZFJ6 | **SAM:** Active **Primary NAICS:** 611710 (Educational Support) | 611430 (Professional Development) | 624190 (Individual & Family Services)

CORE COMPETENCY

Non-clinical, peer-facilitated trauma education for military, veteran, and justice-involved populations. Our 18-session What Really Happened curriculum targets the nervous-system mechanisms behind veteran suicide—reaching the 10.6 veterans per day who die outside VHA contact.

THE PROBLEM WE SOLVE

The Gap:

- 17.6 veterans die by suicide daily; 61% had no recent VHA contact
- Moral injury drives suicide risk but has no standard protocol
- Highest suicide rate: first year post-separation (46.2/100K)
- Clinicians are bottlenecked; veterans won't self-identify as "patients"

Our Solution:

- Peer-delivered curriculum that works outside clinical settings
- Session 09: Shame vs. Responsibility — direct moral injury intervention
- Transition-window psychoeducation before the nervous system fails
- Peer facilitators. No license required. Military-culture language.

WHAT WE DELIVER

Product	Format	Best For
What Really Happened (18 sessions)	Scripted facilitator guides + participant workbooks	Organizations scaling peer-led trauma literacy
Shut Up, I Have Work Tomorrow (90-min)	Standalone module on productivity as dissociation	Workforce development, treatment courts, TAP supplement
Moral Injury Resilience Workshop (3-hr)	Group facilitation + journaling protocol	Chaplains, vet centers, community mental health
Train-the-Trainer Certification	2-day in-person/virtual	Peer specialists, reentry staff, VSOs, corrections
Session 12: Crisis, Suicide Risk, and Staying Alive	Fully scripted 70-minute safety protocol	A room. Not a pamphlet.

DIFFERENTIATORS

- **Peer-facilitated, not clinical** — Reaches populations that reject clinical framing
- **Built from documented C-PTSD case study** — Theory grounded in lived experience
- **Moral injury-informed** — Targets a condition with no standard VA protocol (35-60% of combat vets with PTSD)
- **Veteran-owned + HUBZone-eligible (rural Arkansas)** — Supports agency small business and rural outreach goals
- **Fully scripted, deployable day one** — No infrastructure buildout required

Federal Alignment: Directly addresses VA's call for "touch points outside clinical settings" and supports implementation of the What Works for Preventing Veteran Suicide Act (H.R. 2942).

READINESS / COMPLIANCE STATUS

- **Curriculum Complete:** 18-session What Really Happened framework finalized, SAMHSA-aligned
- **Materials Ready:** Facilitator scripts, safety protocols, participant workbooks prepared for deployment
- **Business Status:** Veteran-owned LLC | CAGE 9ZFJ6 active | SAM registration current
- **Certifications:** SDVOSB eligibility confirmed (DD214 pending) | HUBZone: Clarksville, AR qualifies
- **Deployment Target:** Rural Arkansas pilot design; scalable to VA/DoD, justice systems
- **Next Step:** Seeking institutional partners for first implementation cohort (Q2/Q3 2026)
- **Evaluation Framework:** Pre/post knowledge assessment + retention metrics built into curriculum

---

TARGET CONTRACT VEHICLES

- Staff Sergeant Parker Gordon Fox Suicide Prevention Grant Program (FY2026: $52.5M)
- VA Community Care / reentry peer support services (NAICS 624190)
- DOJ/BOP trauma-responsive programming for justice-involved veterans
- "What Works for Preventing Veteran Suicide Act" pilots (H.R. 2942)
